Our new Service Kits for automatic transmissions

Elring Service Kits for automatic gearboxes include high-quality gasket and filter components in original equipment quality, such as transmission oil filters, oil pan gasket, attachments, bolts, as well as drain or filling screws required for professional gear oil change.

Modern automatic transmissions have to fulfil significant requirements. High mileage and speeds, as well as a large number of gear changes, cause wear on components and additives slowly and unnoticed. Regular gear oil changes not only prevent premature wear, but also increase the switching comfort.
